RCTC PROGRAM PLAN

PROGRAM OUTCOMES:

Upon completion of the Histology Technician program at RCTC, students will achieve the following outcomes:

- Critically examine the foundational concepts, theories and frameworks of histology.
- Troubleshoot errors in histology through systematic reasoning and problem resolution.
- Correlate tissue identification with function and related pathology.
- Analyze tissue structures for quality based on histological technique and staining method.
- Describe the principles of electron microscopy, enzyme histochemistry, immunohistochemistry, and cytology preparation.
- Practice the principles of safety within the laboratory setting.
- Demonstrate the ability to manipulate the tools appropriate for histotechnology.
- Master entry level technical aptitude in all routine histological procedures.
- Evaluate problems for source, cause and potential resolution.
- Apply quality assurance measures to histology processes and procedures.
- Assess the quality of patient samples for accuracy and precision.
- Demonstrate efficiency and timely completion of assigned responsibilities.
- Practice professional conduct and interpersonal communication skills.
- Demonstrate the ethical role and responsibilities of a professional histology technician.
- Practice critical thinking through sound judgment and decision making.
- Develop professional skills as a function of personal growth.
- Practice respect and concern for patient well-being (the needs of the patient come first).
