

RCTC Environmental Science Program Presents

ENVIRONMENTAL JUSTICE, PEOPLE, AND URBAN ECOLOGY

By
Dr. Charles Nilon

Charlie Nilon is a Professor of Urban Wildlife Management in the University of Missouri's School of Natural Resources. His research focuses on urban wildlife conservation and urban ecology, human dimensions of wildlife conservation, and environmental justice. Dr. Nilon and his students study how ecological and socioeconomic factors influence wildlife species composition and abundance. Nilon's research also considers the role of nature as part of an individual's day-to-day environment, and environmental justice issues associated with access to nature.
